Profile

Aspiring Software Test Engineer with strong foundational knowledge in Manual and Automation Testing using Selenium. Familiar with SDLC/STLC processes, bug tracking, and test case design. Passionate about ensuring software quality through effective testing strategies including regression and stress testing.

Education

Bachelor of Engineering – Ajeenkya D Y Patil School of Engineering (12/2021 – 07/2025, Pune, India)

Artificial Intelligence and Data Science; CGPA: 7.38

HSC – Angels Junior College (07/2019 – 08/2021, Ahmednagar, India)

Percentage: 84.50

SSC – Angel's English Medium School (06/2017 – 08/2019, Ahmednagar, India)

Percentage: 83.60

Skills

Testing Skills: Manual Testing, Automation Testing, Selenium WebDriver, Regression Testing, Stress Testing

Tools & Technologies: JIRA, TestNG, Maven

Programming: Java, Python (Basics), SQL

Concepts: SDLC, STLC, Test Case Design, Bug Lifecycle

Soft Skills: Problem Solving, Critical Thinking, Attention to Detail

Projects

Manual Testing Project – E-commerce Website

Designed and executed detailed test cases for modules like login, product search, cart, and checkout. Identified defects and documented them with proper bug reports. Performed functional and regression testing to ensure application quality. Validated UI/UX elements and ensured requirement compliance.

Automation Testing Project – E-commerce Website (Selenium)

Developed automation scripts using Selenium WebDriver and TestNG. Automated regression test cases to improve testing efficiency. Executed test suites and analyzed results to identify failures. Used Maven for project build management and dependency handling.

Certificates

Automation Testing with Selenium – Udemy

SQL Certification Course – Intellipaat
